

850D DISPENSER

DESCRIPTION

The 850D dispenser is a pneumatic dispenser controlled by a pneumatic foot switch. It is ideally suited for dispensing Hilderbrand brazing pastes in large quantities where varying amounts of paste per workpiece are required. It is a simple, robust and relatively inexpensive unit.

KEY FEATURES

- Dispenses brazing pastes and other nonpourable fluids.
- The dispensing is controlled by the operation of the foot pedal.
- Moderate cost.

ACCESSORIES

- The standard kit contains adapters for 10cc and 30cc syringes.
- Other syringe sizes including large capacity cartridges can be used with the corresponding adapters.
